

ENVIRONMENTAL POLICY

AIM Metals & Alloys LP

AIM Metals & Alloys LP is recognized as a company that specializes in the manufacturing of high quality solder for the electronics industry.

For AIM, the environmental dimension is a major stake for society and a competitive factor. Convinced of the dimension, AIM decides to make the environment an integral part and direct its business in a manner to protect the environment by integrating into its policies the preservation of the environment and natural resources.

With a vision to continuously improve, AIM strives for a rigorous environmental management in accordance with the ISO 14001 standard. As a result AIM commits to:

- Comply with all applicable environmental laws and regulations relating to its activities, products and services and other requirements;
- Manufacture environmentally friendly products;
- Prevent and control pollution caused by its activities, paying particular attention to waste management in order to minimize their negative impacts at the source and promoting reduction, reuse and recycling;
- Use resources efficiently and optimally;
- Sensitize its employees, business partners and suppliers of the need for responsible management of their activities, products and services.

This policy is communicated to all persons working for, or on behalf of, the company and is available to the public (see <https://www.aimalloys.com/metals-policies>).

“AIM is a leader in the industry by being a responsible company that complies with all applicable legal requirements that manufactures environmentally friendly products, by optimizing its resources, preventing pollution and preserving the environment.”

Richard Black

President – AIM Metals & Alloys
