

LV05

Lead-Free Solder Wire

FOR DIFFICULT-TO-SOLDER SURFACES

NEW

KEY FEATURES

- Optimized for robotic soldering
- Excellent wetting properties
- Excellent thermal transfer
- Clear, minimal residue
- Low odor/fume
- REACH and RoHS compliant
- ROL1 per current J-STD-004

AVAILABILITY

LV05 is available in SAC305.

LV05 no clean flux cored wire is engineered for high-volume, high-speed electronics assembly. Hand soldering operations benefit from LV05 with fast wetting and low odor, resulting in high operator satisfaction. Consistent soldering performance also makes LV05 ideal for automated soldering operations. LV05 leaves minimal residues that pass IPC J-STD-004 SIR and corrosion requirements.
