

Buy Canadian with CONFIDENCE

From our founding to our future.

We lead with local expertise and a **commitment** to the **Canadian electronics** industry. Our customers choose us because they value transparent supply chains and a partner who is physically there when it counts.

*A Legacy of
Canadian Excellence*

1936

Founded in Montreal

1986

Expanded into manufacturing solder assembly materials for the electronics industry

1988

Relocated global headquarters to a 100+ acre Montreal site and opened Rhode Island operations

1998 - Present

Expanded manufacturing and support globally (Mexico, Europe, and Asia)

2020

Expanded Montreal R&D capabilities

2026 and Beyond

Celebrating 90+ years. We are focused on the future, leveraging our Montreal R&D capabilities to ensure our Canadian customers stay ahead in an evolving market

Why Our Footprint in Canada Matters

Customers looking for Canadian alignment need:

Manufacturing Excellence: Combining global scale, rigorous quality systems, and rapid delivery.

Process-Ready Solutions: Addressing OEM and EMS challenges with integrated support, not just product delivery.

Global Stability: A Canadian foundation and global footprint that ensures supply chain security and responsiveness.

Support in the Field: With a dedicated team of engineers ready to troubleshoot and optimize your process, we ensure you're never alone in the field.

Industries We Serve

AIM supports a **wide range** of electronics assembly segments globally and **within Canada**.

These include:

Military

Aerospace

Renewable Energy

Automotive

We manufacture our full product line in *Canada*

Operations and Capabilities

AIM is structured to support customers who need consistent supply, tight process control, and rapid technical response, from prototypes to full production

AIM continues to invest in technical capability, including R&D resources **centered in Montreal.**

This supports:

- Stronger collaboration with customers early in qualification
- Better technical documentation and training
- Faster product development cycles
- Process-focused problem solving

Solder plus Support

*We don't just manufacture in **Canada**;
We stand behind our products with expert support*

No matter where you are, our Canadian expertise is just a call away!
