

REL61™

Lead-free Solder Alloy

WAVE & SMT: ONE ALLOY THAT DOES IT ALL

KEY FEATURES

- Reduces voiding on BTCs
- Improved wetting versus all low/no-silver alloys
- Low cost Sn-Ag-Cu (SAC) alloy
- Mitigates tin whisker formation
- Improved AOI inspection
- Ideally suited for cost competitive, high performance industries

AVAILABILITY

REL61 is available in bar solder, wire solder and solder paste.

REL61™ lead-free solder alloy is a low silver, cost efficient alloy offering performance better or equal to SAC305. REL61 exhibits superior spread, flow and wetting versus other no/low silver alloys. REL61 improves AOI inspection due to its uniform luster. REL61 is ideally suited for cost competitive industries requiring increased durability and performance, including LED lighting and consumer electronics.

➤ **REL61 Economical, Dependable, SAC alternative.**
